for 10c. and 12½c. cable cord dimities.

Bought an enormous quantity of remnants of Cable Cord Dimities last week, and they were put on sale this morning. If full pieces, they would have to be sold at the regular price of 10c. and 121/2c. yard. Are in lengths of from 2 to 10 yards, and for this reason they can be sold at 4½c. yard. Just as pretty patterns—just as desirable—as though they were in full pieces, because they are THIS season's productions. A host of designs and colorings-figures, stripes and floral effects. Remarkably cheap at 41/2c., and crowds should and will no doubt come for them. All spread out on center counter.

FOR PARIS EXPOSITION.

Groups of Figures Showing Progress of Colored Race. Mr. T. W. Hunster, director of drawing at the Colored High School, has prepared for the showing the progress made by the negro race in school matters since the days of slavery. The object of these groups is to exhibit the development of the public school system and its effect on the home life of the colored people from a period immediately after the close of the civil war to the

present date. The first group shows a family of former slaves as they appeared in 1866. Next in order is the same family, who, a year previous, had undertaken to build themselves home. This was constructed of poles and saplings and covered with brush. The third group presents a young woman teacher from the north who is explaining to a crowd of assembled colored people the advantages of education. Acting upon the teacher's advice, as portrayed in the scene which follows, a public meeting was held and the subject of the lady's address discussed and an agreement reached to erect a school house. The plan was quickly carried into-effect and, as subsequently shown, a log building which answered the purpose erected.

Succeeding groups show that gradually comfortable cottages and better school houses were built, until perfection was reached in the appointment of colored young men and women as teachers and the erecvantages of education. Acting upon the

men and women as teachers and the erec-tion of the high school building in this city. The groups have been photographed for Mr. W. T. Harris, United States commissioner of education, who will retain them in his office, and the exhibit itself will be shipped to Paris in a few days.

CONGRESS HEIGHTS CITIZENS' ASSO-Sensible Views of Mr. M. I. Weller.

The meetings of the Congress Heights Citizens' Association, which was held last night in the former school house there, was made interesting by the delivering of an address to the association by Mr. M. I. Weller of this city. Mr. Weller explained to the members of the organization something about the value of land, and how, in some instances, such value may be best determined. In the course of his address he paid a tribute to Mr. A. E. Randle as the pioneer and founder of Congress Heights, who deserves every success for his work in developing the locality and in endeavoring to do so even further. Mr. Weller urged the association that if it ever had occasion to oppose the extension of any institution or of any buildings, to do so if possible on lecal grounds, and not to the depreciation of the value of the property that may be involved. Some things had been stated renevolved. Some things had been stated re-cently, he said, concerning the value o property in the neighborhood that are to be deplored. He was given a round of ap-plause when he concluded, and was ten-dered a vote of thanks by the association.
